

1 **ABSTRACT OF THE DISCLOSUREA**

2 An air nozzle and relief valve arrangement for use in a vertical tire
3 pump is disclosed to include a lever-operated air nozzle adapted to guide
4 pumped air into the inflatable body (tire), and a button-controlled relief valve
5 installed in the lever-operated air nozzle and protected below the lever of the
6 lever-operated air nozzle against outside dust for discharging excessive air
7 pressure from the inflatable body (tire) when necessary.
